

Are you using the latest Smartphone App Technology for your building or business?

The way people live, do business, interact with friends and clients is constantly changing. FMV Technology provides a range of value adding services for residents living in apartments, people working in commercial buildings and the Facility Manager who manages and maintains any type of building complex.

We do this by combining the latest technology with the desire to give immediate access to quality services and up-to-date, accurate information about your building.

Features

- Business Directory
- Services Directory
- Push Notifications
- Latest Information
- Payment of Services through the App
- Reporting in Real Time
- Event Notification
- Community Interaction

FMV Technology has developed a number of systems that support business, provide services and assist in the management of complex building solutions.

- **Building Specific App for Smartphones**
- **Building Management System**
- **Booking System for Meeting Rooms, Lifts & Visitor Parking**
